

Information About The Service

Here is a summary of all the important information you need to know about Telecom West's Business Landline Bundle plans.

The Service:

Business ADSL is an ADSL2+ fixed ip broadband service offering fast speed internet access with a monthly included data allowance. Once you have used up all your included monthly data allowance you can continue using the service at the same fast speed 'unshaped' and pay excess data charges except for the 'unlimited' plan.

Bundling:

You must have a dedicated phone line for this service to work. This service is conditional on you having a phone line with us and equally the phone line rental is included in the service.

Requirements:

Broadband requires a PSTN telephone service in order to function. You must take up one of the Telecom West business landline plans and enjoy some of the great benefits you get when you bundle your services on the one bill.

You will also require an ADSL modem or router in order to connect your service. If you don't already have one, Telecom West can sell you a suitable device from our large range at an additional cost. For full tech support at no cost we recommend this option as all our modems sold by us are supported by our technical department.

Minimum Term:

Our Business Landline Bundle plans are available on both 24month & 36month agreements.

Included Features:

- Untimed local & national calls!
- Service provided on Telstra infrastructure!
- Australian based customer service!
- **No flagfall**, even on international calls!
- Top 20 international destinations!
- Fixed IP Address!
- 99.3% Uptime Guarantee!

Connection Timeframe:

New connections should be running within 10 business days provided you have an active fixed wire service and no complications arise. If you are transferring an existing dsl connection, once your application has been approved if no complications arise we should have your service running within 5 business days.

Broadband Speeds:

Your actual speed will vary due to number of factors such as your equipment, available ports at the exchange, your distance to the exchange, if you are on a rim or not, software and internet traffic.

Availability:

ADSL2+ is not available to customers in all areas. In addition, it is important to note that fastest residential grade dsl will deliver speeds of up to 20Mbps/1Mbps at selected exchanges where ADSL2+ is available, and up to 8Mbps/384kbps in all remaining ADSL enabled exchanges.

Information About Pricing

Telecom West offers 4 types of Business Landline Bundle plans with different data usage sizes, each plan is designed to suit different calling habits. If you require assistance determining which plan suits your needs best, please call our sales department on 1300 739 331.
